

# Openssh Server

docker-compose.yaml

```
services:
  openssh-server:
    image: lscr.io/linuxserver/openssh-server:latest
    container_name: openssh-server
    environment:
      - PUID=1000
      - PGID=1000
      - TZ=America/Mexico_City
      - USER_PASSWORD=${USER_PASSWORD} #optional
      - USER_NAME=${USER_NAME} #optional
      - PASSWORD_ACCESS=true #optional
      #- SUDO_ACCESS=true #optional
    volumes:
      - ${PATH_TO_APPDATA}/opensshserver/config:/config
      - ${PATH_TO_NAS}/data/movies:/mnt/movies:ro
    ports:
      - 2222:2222
    restart: unless-stopped
```

.env

```
PATH_TO_APPDATA=
PATH_TO_NAS=
USER_NAME=
USER_PASSWORD=
```
